INTERCONNECTION MODULES

SAFEGATE M SGO BOX OSSD

GENERAL

The SAFEGATE M SGO BOX OSSD modules are accessory devices designed to make the wiring of the SAFEGATE and SAFEGATE TRX barriers fast and safe, as well as provide the main controls necessary for their operation close to the protected gate.

In addition to OSSD safety static outputs, terminal blocks for connecting the cables, jumpers and dipswitches for the configuration of the barrier itself.

DESCRIPTION

M SGO BOX OSSD is characterized by:

- Luminous push-button for restart and output status indication.
- > Key selector for Override function.
- > Muting/Override active signalling LED.
- Connectors for wiring the box to the barrier (M12-12-pole male for RX; M12-5-pole female for TX; M12-5-pole male for the muting lamp).
- > Fairlead for the connections toward the machine of:
 - power supply;
 - connection with the output contacts of the internal safety relays and relative EDM;
 - Muting function enabling signals coming from outside;
 - output signals which indicate the status of the safety light curtain.

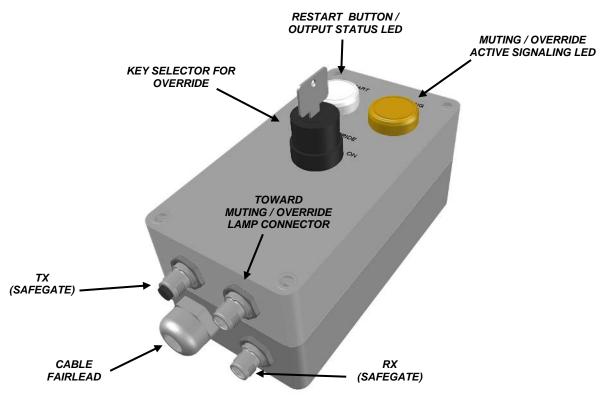

Figure 3 - M SGO BOX OSSD – Connections and signals

M SGO BOX OSSD SAFEGATE ////

When required by the risk analysis of the application, the light curtain permits connection of an external lamp to signal active Muting (0.5÷5W). Perform a check of the operation of this lamp periodically verifying its turning on during the Muting or Override phase.

CONFIGURATION

The configuration of the operating modes is described below.

This configuration is performed following the descriptions of the tables below, by setting the various jumper, connectors and dip-switches located on the main board.

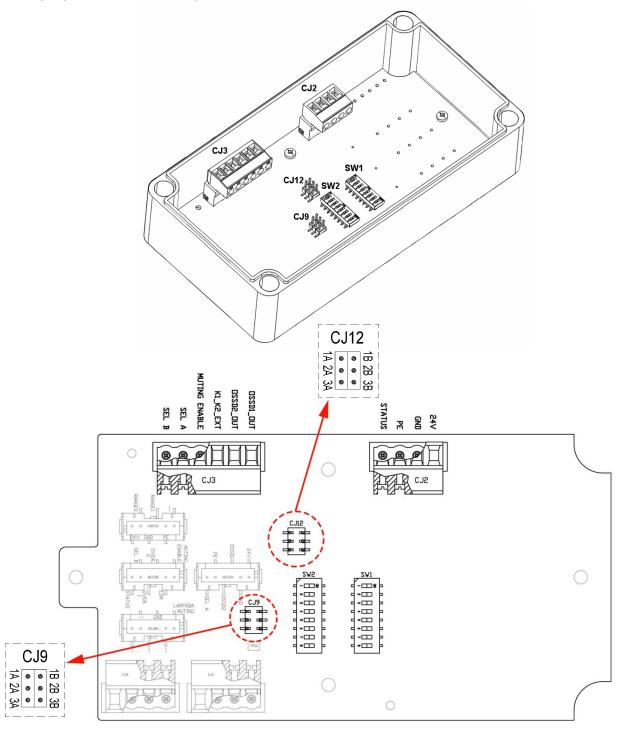

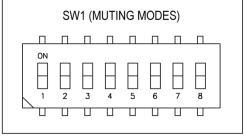

Figure 4 – Main board

SELECTION OF MUTING MODE AND TIMEOUT (DIP-SWITCH SW1)

Manual Mode

| Sequential Muting (4 parallel sensors) | on off | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | Sequential timeout = 30 s |
|--|-----------|---|---|---|---|---|---|---|---|---------------------------------|
| | on off | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | Sequential timeout = ∞ |
| 1 4.4500 | on | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | Concurrent |
| Muting "T" MODE (2 crossed sensors) | off on | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | timeout = 30 s Concurrent |
| | off | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | timeout = 9 hours |
| Muting "L" MODE (2 parallel or crossed sensors) | on off | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | Concurrent timeout = 30 s |
| | on off | | | | | | | | | Concurrent timeout = 9 hours |
| <i>Muting Concurrent (4 crossed sensors)</i> | on off | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | Concurrent timeout = 30 s |
| | on off | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | Concurrent timeout = 9 hours |
| SMP/SMPO Models Programming required | on off | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | |

M SGO BOX OSSD SAFEGATE ////

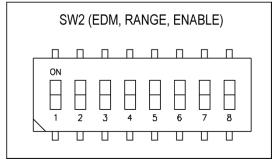

Automatic Mode

| Sequential Muting (4 parallel sensors) | on off on off | 1 2 3 4 5 Image: Second state | | Sequential timeout = 30 s Sequential timeout = ∞ |
|--|------------------------|---|---------------------------------------|---|
| Muting "T" MODE (2 crossed sensors) | on off on off | | | Concurrent timeout = 30 s Concurrent timeout = 9 hours |
| Muting "L" MODE (2 parallel or crossed sensors) | on off on off | 1 2 3 4 5 1 2 3 4 5 1 2 3 4 5 | | Concurrent timeout = 30 s Concurrent timeout = 9 hours |
| Muting Concurrent (4 crossed sensors) | on off on off | 1 2 3 4 5 1 2 3 4 5 1 2 3 4 5 | 5 6 7 8 1 1 1 1 5 6 7 8 1 1 1 1 | Concurrent timeout = 30 s Concurrent timeout = 9 hours |
| SMP/SMPO Models Programming required | on off | | 5 6 7 8 | |

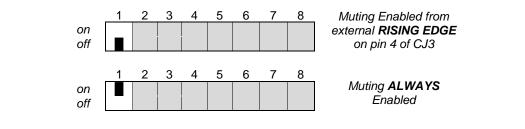

If a time out limit of 9 hours is a too short time for a particular machine cycle, the configuration without time monitoring (t=∞) can be selected. In this case alternative solutions or additional measures shall be implemented to detected the condition of a muting function permanently active caused by accumulation of faults or by the muting sensors activated all the time. For example for the application of guarding the openings of a conveyor system (palletizers) by monitoring appropriate signals generated by the transport system to determinate if and when a pallet is in the detection zone.

Perform a specific risk analysis of the application if the timeout $t = \infty$ is selected.

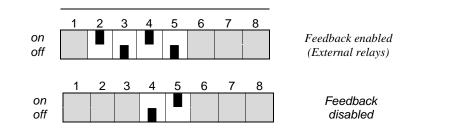

EDM, RANGE, MUTING ENABLE SELECTION (DIP-SWITCH SW2) (VIA HARDWARE)

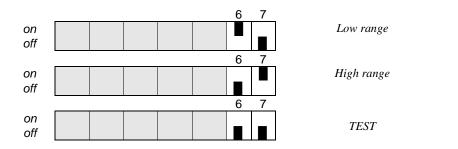

Muting Enable Configuration (Dip-Switch SW2)

Feedback (EDM) enabled (Dip-Switch SW2)

Range Selection (All models – TRX excluded)

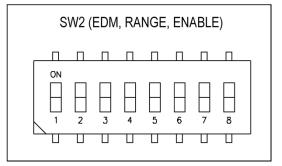

M SGO BOX OSSD SAFEGATE ////

EDM, RANGE, MUTING ENABLE SELECTION (DIP-SWITCH SW2) (VIA SOFTWARE)

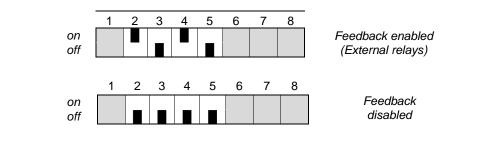

All settings of the Dip-Switch SW2 and the Jumper CJ9 must respect the configuration of the Safegate Software.

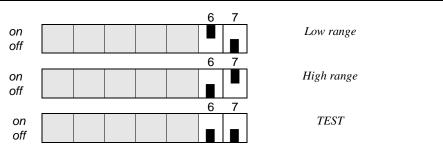

Muting Enable Configuration (Dip-Switch SW2)

Feedback (EDM) enabled (Dip-Switch SW2)

Range Selection (All models - TRX excluded)

OVERRIDE SELECTION (CJ9)

| JUMPER | PIN | DESCRIPTION | SELECTION PRESET |
|-------------|------------------------|-----------------------------------|---------------------|
| CJ9 ⋧●●₿ | 1A <-> 2A 1B <-> 2B | Override 1 (Spring Return Key) | Override 1 |
| 2B 3B | 2A <> 3A 2B <> 3B | Override 2 (Push-button) | (Spring Return Key) |

SELECTION STATIC OUTPUTS (CJ12)

| JUMPER | PIN | DESCRIPTION | SELECTION PRESET |
|---------------------------------|----------------------|-----------------------|------------------|
| CJ12 | 1A <> 2A 1B <> 2B | Static outputs | |
| 3 2B 3B • • • • • • • • • | 2A <> 3A 2B <> 3B | Selection not allowed | Static outputs |

INSTALLATION AND ELECTRIC CONNECTIONS

- The M SGO BOX OSSD modules can be fixed to the wall, using the proper plastic brackets inserted in the holes placed on the box rear side corners. These brackets can easily rotate to reach 90°.
- The light curtain must be connected to the respective connectors M12 (Fig.1) using the dedicated • cables.
- The cables coming out from the cable gland (PG11) must be connected depending on its utilization - to the connectors CJ2 and CJ3. Terminal tightening torque: 4,4lb-in (0,5 Nm) is mandatory.
- Use 60/75°C copper (Cu) conductor only. Wire size range: AWG 12÷30, (solid/stranded) (UL).
- The working temperature is: -25°C ÷ 55°C.

| Terminal board CJ2 | | | |

SIGNALS

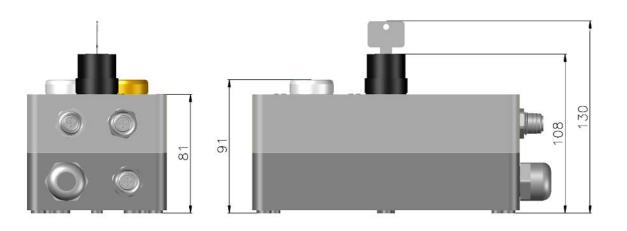

| SIGNAL | CONDITION | MEANING |
|-----------------|---------------------------------|--|
| OUTPUT STATUS | ON | Outputs active |
| (White) | OFF (Low intensity blinking) | Light curtain occupied: outputs disabled |
| MUTING OVERRIDE | ON | Muting function (or Override) active |
| (Yellow) | OFF | Normal operation |

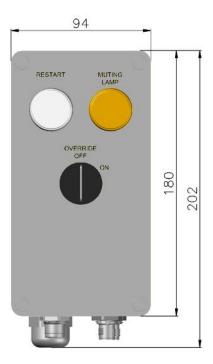

SAFETY STATIC OUTPUTS TECHNICAL DATA

The M SGO BOX OSSD module uses two safety static outputs (OSSD) for the output circuit. The technical data of the outputs are reported on the following table.

| SAFETY STATIC OUTPUTS TECHNICAL DATA | | |
|--------------------------------------|---|--|
| Safety Outputs (OSSDs) | 2 PNP – 400mA @ 24VDC | |
| STATUS Output | PNP – 100mA @ 24VDC (shows the condition of the OSSD outputs) | |

MECHANICAL DIMENSIONS

All dimensions are expressed in mm

INDICATIONS AND INFORMATION FOR ENVIRONMENTAL PROTECTION

Dispose of the product in an eco-compatible manner and in accordance with national legislation.

For Countries in the European Union:

Pursuant to the Directive no. 2012/19/EU on waste electrical and electronic equipment (WEEE)

The crossed out wheelie-bin symbol on the equipment or its packaging means that when the product reaches the end of its useful life it must be collected separately from other waste.

Proper separate collection of the discarded equipment for later environment-friendly recycling, processing and disposal, helps to avoid any negative impact on the environment and health and encourages re-use and recycling of the materials the equipment is made of.

In each individual Member State of the European Union this product is required to be disposed of in accordance with Directive **2012/19/EU** as implemented in the Member State where the product is disposed of.

For further information please contact ReeR or your local dealer.

Precise, complete compliance with all standards, instructions and warnings in this handbook is essential for the correct operation of the device.

ReeR S.p.A. therefore declines any responsibility for all and anything resulting from failure to comply with all or some of the aforesaid instructions.

Characteristics are subject to change without prior notice. No part of this document may be reproduced unless authorised by ReeR.
