

## MOSAIC-PC USB CONNECTION CABLE (CSU-C)

### INTRODUCTION

CSU-C is an interconnection cable necessary to connect the Master MOSAIC M1S COM to the PC with the MSD configuration software installed.

- ➔ Connect the CSU-C cable only with MSD software installed: the driver necessary to the identification of the Master is contained in the software.
- ➔ The cable has two connectors:
  - 1) USB type "A" connector for the connection to the PC.
  - 2) "USB-C" connector for the connection to Master module.
- ➔ The length of CSU-C is 2m  
=> DO NOT USE OTHER CABLES OR LONGER THAN 3m.  
The configuration software automatically recognises a connected and operative Master module and indicates this in the status bar.
